Especificaciones

|                                              |             |
|----------------------------------------------|-------------|
| Altura Máxima de Trabajo                     | 40m         |
| Altura Máxima Piso Canasta Elevada           | 38m         |
| Alcance Horizontal                           | 24m         |
| Dimensiones de la Plataforma (Largo × Ancho) | 2.44× 0.91m |
| Longitud – Replegada                         | 14.17m      |
| Ancho                                        | 2.49m       |
| Altura – Replegada                           | 3.08m       |
| Distancia entre Ejes                         | 3.96 m      |
| Altura Libre al Suelo                        | 0.28m       |
| Peso                                         | 22900kg     |

Productividad

|                                       |               |
|---------------------------------------|---------------|
| Capacidad de Peso en Canasta          | 300 kg        |
| Máximo de Ocupantes en la Canasta     | 2 personas    |
| Rotación de Plataforma                | ± 90°         |
| Rotación del plato giratorio          | 360° Continuo |
| Nivelación de la plataforma           | Automático    |
| Velocidad de Traslado – Replegado     | 5km/h         |
| Pendiente Máxima Admitida – Replegado | 45%           |
| Radio de Giro (Interno)               | 4.14m         |
| Radio de Giro (externo)               | 7.02m         |
| Tracción y Dirección                  | 4X4           |
| Llanta                                | 385/65-22.5   |

Potencia

|                                   |                  |
|-----------------------------------|------------------|
| Motor                             | CUMMINS          |
| Potencia                          | 54 kw / 2400 rpm |
| Volumen del tanque de combustible | 151 L            |
| Voltaje de control                | 12V              |
